

Amount of water being stored broken down by the sum of the ratios of the concentrations required by law (estimate)

Increase from the previous data (March 31, 2019)

 Stored amount of treated water that generated from March 31, 2019 (previous announce) to June 30, 2019 (Only filled tanks are counted.)

※ Sums may be less than 100 because storage percentages have been rounded to integers
