- \*2 Rate plans before the full liberalization of the electricity market (excluding optional agreements) such as Meter-Rate Lighting, Low-Voltage Electricity, etc.
- \*3 Rate plans after the full liberalization of the electricity market such as Standard Plan, Premium Plan, Smart Life Plan, Power Plan, etc., and optional agreements such as Denka Jozu
- \*4 A consumption tax and other costs are included in the prices.
- \*5 February 2025 rates (January 2025 consumption. However, this correlates to February 2025 consumption for high-voltage supply contracts for which meters are read on the first day of each month) include unit price discounts (low-voltage supply: 2.50 yen/kWh, high-voltage supply: 1.30 yen/kWh) as a nationwide measure for subsidizing electricity/gas rates. However, these measures do not apply to extra high-voltage supply contracts. For further details, please refer to [the page on our website dedicated to this topic](#) (in Japanese only).  
Please note that February 2025 rates correlate to consumption during the period from when the meter is read (or measurement date) in January 2025 to the day before the meter is read (or measurement date) in February 2025. However, for high-voltage supply contracts for which meters are read on the first day of each month, this correlates to consumption during the period from February 1, 2024 to the last day of February, 2025.
