

## <Marine Organism Rearing Log>

9 AM, September 1, 2022

Weather: Sunny

Water temperature: 17.6°C

The researchers from Marine Ecology Research Institute who involved and advised us from design phase of rearing facility have reviewed our facility operation and rearing process. They gave us fruitful advises on not only current rearing training facility, but also on rearing test facility which will start in near future.

Showing overview of rearing training facility

Checking conditions of the flounders

Checking appetite (health condition) of the flounders

Checking conditions of the abalones
