

<Marine Organism Rearing Log>

9 AM, October 3, 2022

Weather: Sunny

Water temperature: 19.0°C

Around 10 am, approx. 40L of treated water of 150,000 Bq/L was added to 2 of 5 series of tanks for rearing (each series of tank contains 4,000L), then started rearing in seawater of tritium concentration of 1,500Bq/L. The flounders showed no differences before and after addition, they are now actively swimming around the tank.
