

<Marine Organism Rearing Log>

9 AM, October 25, 2022

Weather: Cloudy

Water temperature: 18.6°C

We started rearing of 200 abalones at the rearing test facility. The 80 abalones out of 200 were put in a small net sack one by one and put them in the tank without harming them in order for us to sample and measure tritium concentration easily. 600 more abalones will be arriving tomorrow and after.
