

<Marine Organism Rearing Log>

9 AM, November 7, 2022

Weather: Sunny

Water temperature: 18.5°C

Extraction procedure (freeze-dry) to collect bodily fluid (free water) from the filleted samples from last week, we were able to collect ave. of approx. 8g from flounders and ave. of approx. 3g from abalones. We will work on improvement on suction and refrigeration efficiency to further harvesting of fluid volume.
