

<Marine Organism Rearing Log>

9 AM, November 14, 2022

Weather: Sunny

Water temperature: 18.3°C

When abalones NEPPARU (means “to cling”, a dialect in Hamadoori) on the bottom or walls of the tank and won’t come off, try not to pull away forcefully or you would tear off its internal organs. Sticking this pallet into the gap between an abalone and the wall, it comes off easily. You need a trick to stick it into the gap at the abalone’s moment off-guard, though.
