

<Marine Organism Rearing Log>

9 AM, November 18, 2022

Weather: Sunny

Water temperature: 18.5°C

It has been 65 days since we started rearing flounders and 23 days for abalones. The number of marine organisms we are currently rearing is shown on the figure below. In order to verify tritium concentration in bodily fluid, we sampled them or transferred tanks so the number varied. So we recounted for this time. No dead this week.

<Next report will be on November 21, 2022>
