

## <Marine Organism Rearing Log>

9 AM, December 6, 2022

Weather: Rainy

Water temperature: 18.2°C

Let us inform you that conditions of water quality improvement (about looks) which is taken place at the rearing training facility.

It is difficult to see the difference on the photos, the color of water is getting lighter gradually, though.

The yellow coloring of seawater is caused by the accumulation of organic substances in food and excrement that is difficult to decompose by bacteria and UV irradiation.
