

<Marine Organism Rearing Log>

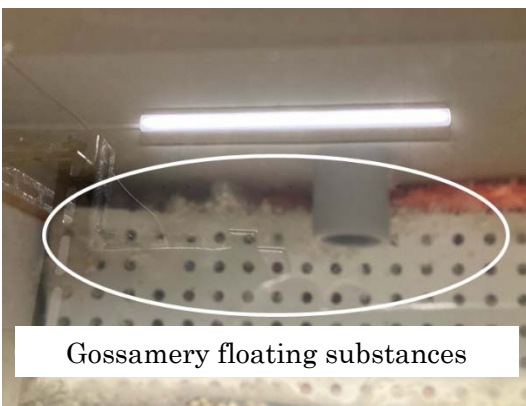

9 AM, December 9, 2022

Weather: Sunny

Water temperature: 18.5°C

Let us inform you of condition of water quality improvement (Vol. 3) following from yesterday. Denitrification unit decomposes nitric acid by action of bacteria, however, massive floating substance which broke out by action of bacteria within the unit clogs the pipe. We will once take apart the unit and clean it next week.

<Next report will be on December 12, 2022>
