

<Marine Organism Rearing Log>

9 AM, January 18, 2023

Weather: Sunny

Water temperature: 18.5°C

Since October, 2022, we have been rearing approx. 800 of abalones, and at that time we transferred 200, 300, and 300 abalones into the test facility in 3 times over 3 days. We had no idea that shakeups during transportation and slight difference of handling at receipt would cause the subsequent death of abalones. It is very regretful.
