

<Marine Organism Rearing Log>

9 AM, February 6, 2023

Weather: Sunny

Water temperature: 18.3°C

The injury prevention measures for abalones that we have been working on since last year have just been settled once. The following measures have been completed: eliminating the “overcrowding” condition in the tank, changing from the curved surface shelter to the flat surface shelter, enlarging the holes for movement, improving the cleaning methods, etc. These should begin to take effect gradually.
