

<Marine Organism Rearing Log>

9 AM, February 8, 2023

Weather: Sunny

Water temperature: 18.3°C

We find various intruders in the tank because it is not under antiseptic conditions. Let us introduce you a small crustacean called "skelton shrimp", and supposedly attached to one of the abalones. It is an intermediate host of parasite on sea bream, but its impacts on flounders are unknown. It looks like a stick insect.
