

<Marine Organism Rearing Log>

9 AM, February 14, 2023

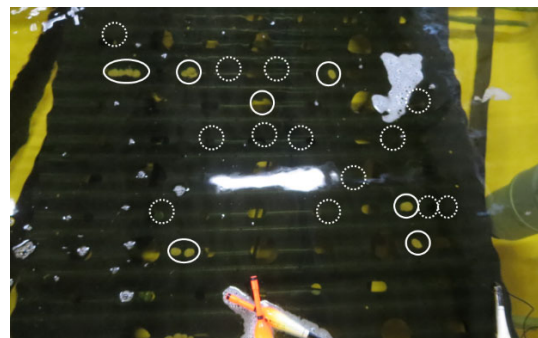

Weather: Sunny

Water temperature: 17.4°C

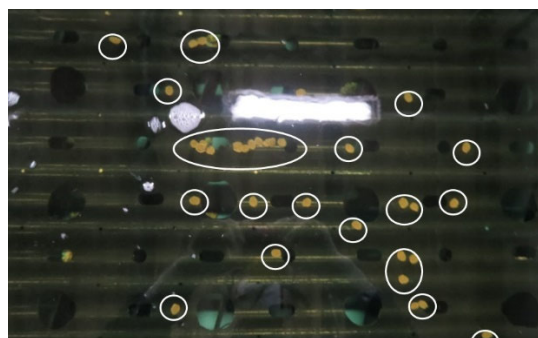

The volume of food for the abalones is decided depending on the size of the abalones and the number of them in each tank then we arrange the conditions of each tank are the same. Also, we check the leftovers of the food set on top of the shelter the next morning and assume their health conditions as well as review feeding methods for improvements.

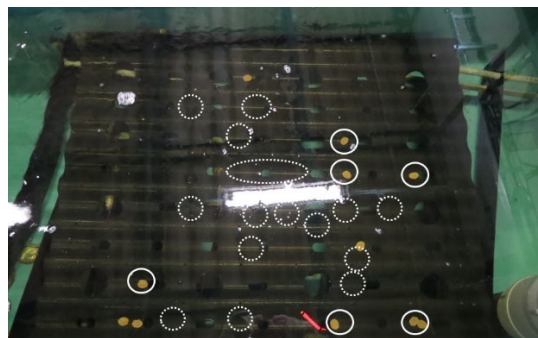

Feeding condition in ALPS treated water added tank  
(Evening of February 13, 2023)

Leftover condition in ALPS treated water added tank  
(Morning of February 14, 2023)
