

## <Marine Organism Rearing Log>

9 AM, March 6, 2023

Weather: Rainy

Water temperature: 17.6°C

It has been almost six months since the start of the rearing test. The work of the caretakers is improving with experience and handling is much better. We will introduce their routine work in today's and tomorrow's report. Each caretaker is confidently performing their tasks such as cleaning the tanks, checking the water quality and preparing the feed.
