

<Marine Organism Rearing Log>

9 AM, March 14, 2023

Weather: Sunny

Water temperature: 18.0°C

Let us show you today how the senior flounders are fed. They will be 2 years old this coming spring and they gobble more than the junior flounders. Once I accidentally got a bite on my finger by a 20 cm flounder that mistook it for food and my finger bled. Some of the flounders in this tank are over 40 cm, and we should not put our hands in this tank.
