

<Marine Organism Rearing Log>

9 AM, March 20, 2023

Weather: Sunny

Water temperature: 17.5°C

The abalones kept in the training facility are about a year older than those in the test facility. Therefore, the former acts more briskly like turning around 360-degree, and starts to get about at night for feeding. However, abalones delight in taking a nap by nature and lie still during the day.

<Next report will be on March 22, 2023.>
