

<Marine Organism Rearing Log>

9 AM, March 24, 2023

Weather: Cloudy

Water temperature: 17.7°C

As I predicted the day before yesterday, the cherry tree on the west side of the rearing test facility bloomed. But flounders turn their whole attention to their dinner, and they repeat eating and sleeping days. As March 11 passed over now, visits from mass media decreased, so they look to feel peacefully calm all day long.

<The next report will be on March 27>
