

<Marine Organism Rearing Log>

9 AM, April 3, 2023

Weather: Sunny

Water temperature: 18.4°C

A new fiscal year has just started in Japan. New students and new workers become a popular topic of conversation. The flounders and abalones have also become one year older. Although they were affected by parasites and injuries in the last fiscal year, we were able to improve the situation with the help of our experts Mr. F and Mr. K.

We will continue to carefully explain the status of rearing in the new fiscal year as well.
