

<Marine Organism Rearing Log>

9 AM, April 27, 2023

Weather: Sunny

Water temperature: 17.7°C

Some of the samples collected from the tanks are stored in polyethylene bags in the freezer. As the number of samples in the freezer increased, we decided to introduce more airtight aluminum-laminated bags and seal them by fusing the mouths to prevent interference among samples. It is like retort pouched curry.
