

<Marine Organism Rearing Log>

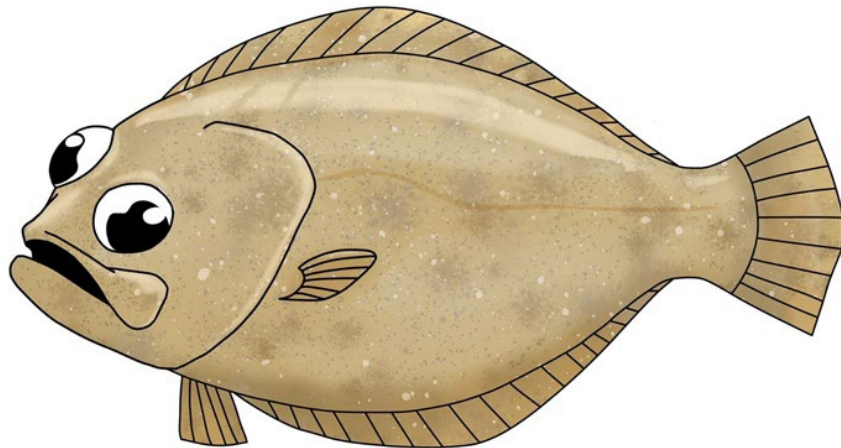

9 AM, June 12, 2023

Weather: Cloudy

Water temperature: 17.8°C

Tritium contained in the body fluid of marine organism is expressed in the amount per litre. On the other hand, since tritium in the muscle is measured in the condition of water just like with the case of body fluid, it is either expressed in the amount per litre, or expressed after measured value is converted as per 1 kilogram of dried muscle.

Amount of tritium in the body fluid: Bq (Becquerel)/L(Liter)

Amount of tritium in the dried muscle: Bq (Becquerel)/L (Liter)

Bq (Becquerel)/Kg (Kilogram)
