

< Marine Organism Rearing Log >

July 4, 2023 9:00 a.m.

Weather: Cloudy

Water temperature: 17.5°C

Yesterday, we introduced you to the water quality control terminal. The beauty of this device is that you can see the trends for each datapoint. However, the sensors for each datapoint need frequent maintenance and have high error margins, so measurements obtained by manual analysis are used for water quality control.
