

< Marine Organism Rearing Log >

9 AM, July 6, 2023

Weather: Cloudy

Water temperature: 18.6°C

IAEA Director General Grossi visited our power plant to commemorate the opening of the on-site IAEA office. At the breeding and testing facility, a technical agreement on marine life breeding between the IAEA and TEPCO was signed by Director General Grossi and a TEPCO representative. Under the continued guidance of the IAEA we will strive to work with an even greater sense of urgency.
