

<Marine Organism Rearing Log>

9 AM, July 24, 2023

Weather: Sunny

Water temperature: 17.7°C

We purchased a new camera to take photos for this Marine Organism Rearing Log. The new camera has three underwater photography modes as well as a close-up function. This purchase will enable us to provide you with more vivid and clear images of flounder and abalone.

**Looking into the tank with the camera**
