

<Marine Organism Rearing Log>

9 AM, August 22, 2023

Weather: Sunny

Water temperature: 18.5°C

Yesterday's flounder alignment. Upon closer inspection of the photo we started to worry that they might actually dislike the Youtube camera. So, we changed the position of the camera and observed them for a while. At first, the flounder were in disarray, but after a while, they lined up in the same way with the camera in between them. Our suspicion was proven wrong.
