

Marine Life Rearing Log>

9 AM, September 1, 2023

Weather: Sunny

Water temperature: 17.8°C

Yesterday, Professor Tauchi (Ibaraki University), an expert on the biological effects of tritium, visited our marine life rearing and testing facility. He taught us about the importance of continuing to convey to the public that flounder and abalone are growing well even in a tritium environment.

<Next report will be on September 4>.

The number of dead abalone / removed for research

	No. of dead abalone		Removed for research	
	8/25-8/31 (No.)	Survival Rate (%, Accumulated)	8/25-8/31 (No.)	Accumulated (No.)
Regular seawater ①	1	65.2	0	0
Regular seawater ②	2	56.1	0	0
ALPS water added ①	3	59.4	0	0
ALPS water added ②	3	51.2	0	1

\*There were no flounder deaths.

\*For accuracy, flounder are counted from Friday of the previous week to Thursday.
