

<Marine Life Rearing Log>

9 AM, September 28, 2023

Weather: Rainy

Water temperature: 18.5°C

In the rearing and testing facility, we change into indoor shoes for sanitary reasons. And, when going inside the weir of the ALPS treated water tanks, we change shoes again to prevent tritium from adhering to the soles of the indoor shoes and contaminating other areas of the facility. A cane is provided to prevent losing one's balance when changing shoes.
