

<Marine Organism Rearing Log>

9 AM, November 22, 2023

Weather: Sunny

Water temperature: 18.5°C

These are still shots taken from the video posted on September 6. The abalone's face was shot from the front and from directly below. It looks a little grotesque at first glance, but if you look at it closely, the eyes and mouth are actually quite adorable, and the feelers (antennae) are also unique, making this creature very lovable.

<Next report will be on November 24>
