

<Marine Organism Rearing Log>

9 AM, November 24, 2023

Weather: Sunny

Water temperature: 18.2°C

We have begun building the roof of the viewing platform that will enable visitors to see the marine organism rearing test facility as mentioned in the April log. And, we have also started replacing lighting (steam-induced corrosion countermeasure) and demarcating work areas (to improve the efficiency of air conditioning) in an effort to improve the facility's environment.

<Next report will be on November 27>
