

<Marine Organism Rearing Log>

9 AM, November 30, 2023

Weather: Sunny

Water temperature: 18.5°C

It is almost time for semi-annual health checkups. We first gave the flounder in the training and rearing facility a checkup. All the keepers worked together to check for, and remove, parasites from the gills and throat after anesthetizing the flounder while giving them a salt water bath and taking physical measurements. This flounder is getting very big!
