

<Marine Organism Rearing Log>

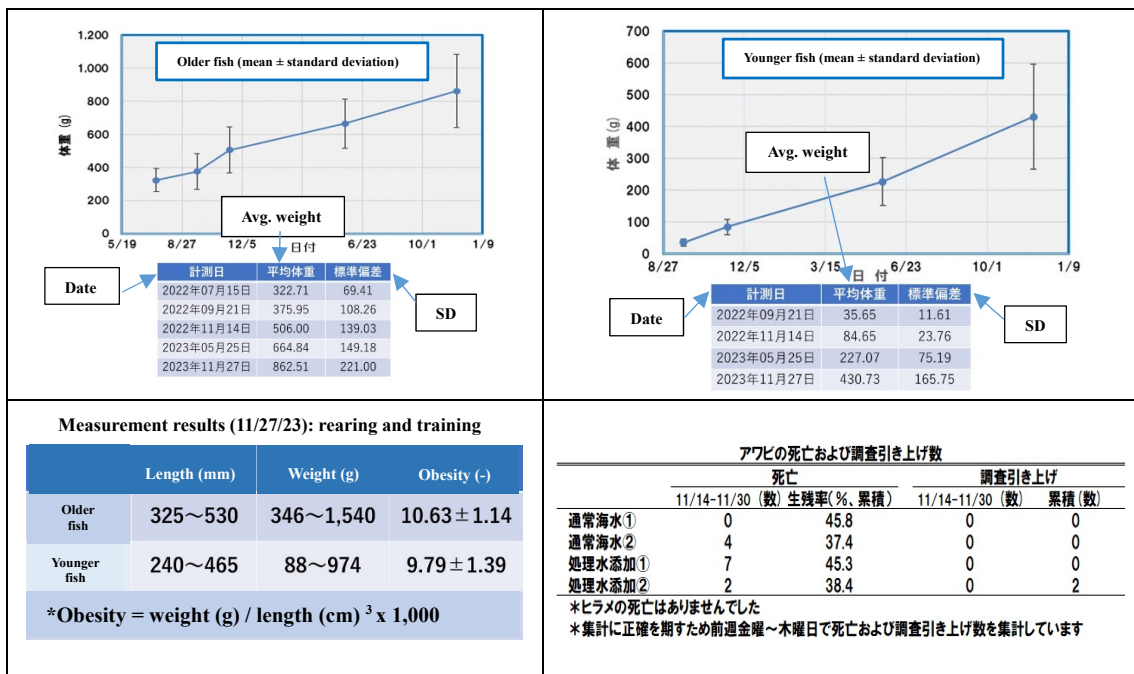

9 AM, December 1, 2023

Weather: Sunny

Water temperature: 18.0°C

Both young and old flounder at the training and rearing facility are growing well. However, we have found parasites on the flounder, so we will continue to carefully monitor them and implement measures to prevent parasites, such as giving the flounder salt water baths as necessary. Next week, we will explain our anti-parasite measures in detail.

<Next report will be on December 4>

The number of dead abalone / removed for research

	No. of dead abalone		Removed for research	
	11/24-11/30 (No.)	Survival Rate (%、accumulated)	11/24-11/30 (No.)	Accumulated (No.)
Regular seawater ①	0	45.8	0	0
Regular seawater ②	4	37.4	0	0
ALPS water added ①	7	45.3	0	0
ALPS water added ②	2	38.4	0	2

\* No flounder deaths

\* For accuracy, counted from Friday of the previous week to Thursday
