

<Marine Organism Rearing Log>

9 AM, December 6, 2023

Weather: Rainy

Water temperature: 18.2°C

So far, "salt water bathing" has been found to be an effective way to prevent parasites. However, when salt water bathing was conducted in June 2022, some flounder died thereafter. Therefore, we devised a method that is less stressful for the flounder and requires less seawater.
