

<Marine Organism Rearing Log>

9 AM, December 18, 2023

Weather: Sunny

Water temperature: 18.2°C

The renovations to maintain room temperature in the rearing and testing facility that we told you about previously have been completed. Until now, there was space above the partitions that was affected by the cold and warm air from outside. By sealing up this space with a noncombustible tarp, we have made it easier to maintain the room temperature at 20°C, thereby improving the rearing environment.
