

<Marine Organism Rearing Log>

9 AM, December 21, 2023

Weather: Sunny

Water temperature: 18.0°C

This is a video of an abalone at the training and rearing facility. The frantic movement of the abalone after being flipped over, twisting its body from side to side repeatedly, and finally returning to its original position, is both jittery and comical. It's amazing to see how far it can stretch its body, which is usually hidden under its shell.
