

<Marine Organism Rearing Log>

9 AM, December 25, 2023

Weather: Sunny

Water temperature: 18.1°C

As mentioned in the November 24th rearing log, work has begun on the roof of the viewing platform that will enable visitors to see the rearing facility from outside its windows. The roof will be built like a carport, and the construction is in full swing. This includes excavation to build a strong foundation that will prevent it from being damaged by wind, etc.
