

- The telescopic device that will be used for the Unit 2 fuel debris trial retrieval departed from the Mitsubishi Heavy Industries Ltd. Kobe Factory for the Fukushima Daiichi Nuclear Power Station on July 3, and it arrived at the JAEA Naraha Center for Remote Control Technology Development (NARREC) on July 5.
- Upon arrival, we changed a shipping company at NARREC, and it arrived at the Fukushima Daiichi Nuclear Power Station today, on July 10.
- Going forward, we will check the device to prepare it for installation inside the Unit 2 reactor building and transport it around the building, which is currently scheduled for mid-July or later.
