

Completion of Transportation of Fuel Handling Equipment to be Used to Remove the Fuel from Unit 2 Spent Fuel Pool to the Fuel Removal Work Platform

- On May 21, 2025, the fuel handling equipment that will be used to remove fuel from Unit 2 spent fuel pool (hereinafter referred to as, “SFP”) was shipped from the manufacturer’s factory and brought onto the power station site on May 24.

<Announced on May 26>
- On May 30, the fuel handling equipment was hoisted on top of the Unit 2 fuel removal work platform and affixed to the runway girder* rails. *The foundation for moving rails laid across the reactor building and the platform
- We will continue to remain steadily and safely to aim to start removing fuel from the Unit 2 SFP during FY2026.
