

Survey results regarding APD usage

1. Survey Objectives

We have conducted a questionnaire survey to determine if workers had used APDs inappropriately in an organized manner, as there was a case where a team leader of a subcontractor overseeing restoration works at Fukushima Daiichi Nuclear Power Station instructed workers to cover their APDs with lead covers.

2. Survey Targets

The following workers presently engaged in works at Fukushima Daiichi Nuclear Power Station

【TEPCO】 Group Managers , shift supervisors, team leaders, and deputy general managers of the Fukushima Daiichi Nuclear Power Station and Fukushima Daiichi Stabilization Center

【Cooperative companies】 team leaders of member companies of the conference for the promotion of safety, and their primary subcontractors

3. Survey Duration

July 23, 2012 ~ August 6, 2012

4. Survey Contents

The survey checked if there were any such cases of witnessing receiving consultations concerning instructed or being instructed to engage in, inappropriate usage or fabrication of APDs, in order to facilitate more precise measurements.

5. Survey Results

Inappropriate usage or fabrication were not reported

	Total number of surveys	Answers reporting cases of inappropriate usage or fabrication
TEPCO	291 persons	0 persons
Cooperative companies	770 persons	0 persons
Total	1061 persons	0 persons
