

Nuclide Analysis Results of Radioactive Fallout at and around the Site of Fukushima Daiichi

reference

	Sampling Location		Sampling Duration		Radioactivity Density (B q / m ²) (Half-Time)		
			From	To	I - 131 (Approx. 8 days)	Cs - 134 (Approx. 2 years)	Cs - 137 (Approx. 30 years)
Fukushima Daiichi		Environment Management Building	2011/12/1 11:10	2012/1/5 11:20	ND	17000	22000
Fukushima Daini		Main Office building	2011/12/1 11:25	2012/1/5 10:30	ND	80	100

$B q / m^2 = M B q / k m^2$

* "ND" means the sampled data is below measurable limit (approx. 180Bq/m² for I-131).
 Please note that these nuclides are sometimes detected even when they are below the limits, contingent on the detector or samples.
