## Nuclide Analysis Results of Radioactive Fallout at and around the Site of Fukushima Daiichi NPS

|                       | Sampling Point |                                 | Sampling Period    |                    | Radioactivity Density of Samples (Bq/m <sup>2</sup> )<br>(Half-life) |                             |                              |
|-----------------------|----------------|---------------------------------|--------------------|--------------------|--|-----------------------------|------------------------------|
|                       |                |                                 | From               | To                 | I-131<br>(approx. 8 days)  | Cs-134<br>(approx. 2 years) | Cs-137<br>(approx. 30 years) |
| Fukushima Daiichi NPS |                | Environment Management Building | 2012/11/1 11:00 AM | 2012/12/3 10:40 AM | ND   | 1600                        | 2900                         |
| Fukushima Daini NPS   |                | Administrative Office Building  | 2012/11/1 2:40 PM  | 2012/12/3 11:15 AM | ND   | 15                          | 22                           |

\* Bq/m<sup>2</sup> = MBq/km<sup>2</sup>

\* When the measurement value is below the detection limit, "ND" is marked. (I-131: approx. 110Bq/m<sup>2</sup>)

As the detection limit may vary depending on the detectors and sample properties, there are cases where nuclides below the detection limit are detected.
