

Nuclide analysis results of ocean soil

Reference

(Data summarized on May 12)

Place of Sampling	Around 10 km offshore of 1F				
Time of Sampling	May 10, 2012 6:25 AM				
Detected Nuclides (Half-life)	Radioactivity density ( Bq/kg·moist soil)				
I-131 (approx. 8 days)	ND				
Cs-134 (approx. 2 years)	17				
Cs-137 (approx. 30 years)	23				

\* Data of other nuclides are under evaluation.

\* "ND" means the sampled data is below measurable limit.

I-131: approx. 2Bq/kg·moist soil )

Please note that these nuclides are sometimes detected even when they are below the limits, contingent on the detector or samples.

Radioactivity Density of Ocean Soil around 10 km offshore of Fukushima Daiichi (T-B3) (Bq/kg (moist soil))
