Cs-137 (Approx. 30 years)	420	-			

* Data of other nuclides is under evaluation.

* "ND" indicates that the measurement result is below the detection limit.

I-131: Approx. 8Bq/kg· Moist Soil) As the detection limit may vary depending on the detectors and sample properties, there are cases where nuclides below the detection limit are detected.

Sampling around south discharge channel of Fukushima Daiichi NPS (around discharge channel of Unit 1-4) was not conducted due to the coordination of other
