Note 1: Approx. 330m south from Unit 1-4 water outlet (T-2)

Note 2: Same sampling point as side ditch in front of the core warehouse sampled on August 19 (announced on August 20) and August 20 (announced on August 21)

Note 3: Water inflow location of drainage channel to the tank area

Note 4: The drainage channel B is being cleaned since September 7.

Note 5: We have corrected the name of the sampling point which had been mentioned as "Drainage channel C OP.30 exit" until September 12. (No change on the sampling location)

\* "ND" indicates that the measurement result is below the detection limit, and the detection limit of each nuclide is provided in parentheses.
