● Since some samples are still under analysis, the highest dose of the Strontium-90 is among those previously announced

\*1 The analysis result of No.2-5 obtained on September 29 is the reference value, since we could not sample groundwater by a regular procedure

\*2 Analysis result of pumped water.

\* "ND" indicates that the measurement result is below the detection limit.

\* Date of sampling is provided in parentheses. ( ): 2013, < >: 2014

\* "" is provided next to the name of the holes where the sampling could not be performed due to the chemical injection of ground improvement.
