| Cs-137<br>(Approx. 30 years)     | 4.2                             | 0.05                        | -                               | -                           | 17   | 0.19                       | 20  | 0.22                        | 28  | 0.31                        | 35  | 0.39                        | 90  |

<sup>\*</sup> The density specified by the Reactor Regulation is converted from Bq/cm3 to Bq/L.

<sup>\*</sup> Data of other nuclides is under evaluation.

<sup>\*</sup> In the case of more than 2 nuclides, the sum of scaling factors to density limits is compared to 1.

<sup>\* &</sup>quot;ND" indicates that the measurement result is below the detection limit.

I-131: Approx. 3Bq/L, Cs-134: Approx.3Bq/L

As the detection limit may vary depending on the detectors and sample properties, there are cases where nuclides below the detection limit are detected.

<sup>\*</sup> The sampling will be performed after opening and closing of the silt fence.
