 * Hyphen "-" indicates that neither sampling nor measurement was implemented.
* (6) was selected as a sampling location in the upstream of groundwater (sampling done once a week

starting from April 29, 2011) since it became unable to do sampling at (4).

* Sampling at ⑦ (located in the downstream of the groundwater) has been done since May 26, 2011. * Samping at (8) since May 30, 2011

* Sampling at (9) has been done since August 2, 2011

* "ND" indicates that the measurement result is below the detection limit.

I-131: Approx. 0.008Bq/cm³, Cs-134: Approx.0.01Bq/cm³, Cs-137: Approx.0.02Bq/cm³ (October 2, 2014)

As the detection limit may vary depending on the detectors and sample properties, there are cases where nuclides below the detection limit are detected.

CPlace of Sampling>

Southeast of Unit 4 Turbine Building
Northeast of the Process Main Building
Southeast of the Process Main Building
Control of the Process Main Building

④ Southwest of the Process Main Building

5 South Part of the Miscellaneous Solid Waste Volume Reduction Treatment Building

6 Southwest Part of the On-site Bunker Building

(7) West Side of the Incineration Workshop Building

8 North Part of the Miscellaneous Solid Waste Volume Reduction Treatment Building
