Analysis result of seawater sample: Yotsukura beach, Nakoso beach in Fukushima Prefecture

<Reference> June 29 , 2015 Tokyo Electric Power Company

Sampling Place (One spot each)
Yotsukura beach (2) Nakoso beach

2. Sampling method: Collect the seawater directly on the edge of the surf

		Offit.Dq/L	
		Yotsukura beach	Nakoso beach
Date		June 22, 2015	June 22, 2015
Time		10:00	11:15
Cesium 134	Concentration	ND	ND
	Detection limit	1.2	1.0
Cesium 137	Concentration	ND	ND
	Detection limit	0.9	1.3
Gross β	Concentration	ND	ND
	Detection limit	17	17
Tritium	Concentration	ND	ND
	Detection limit	1.5	1.5

Unit:Bq/L

(Note) In case of less than detection limit, it is described as"ND"

Target	Analysis method	Manual applied	
Cesium		Guideline with regard to measuring released-radioactive material at the light-water type nuclear reactor for power generation. (Nuclear Safety Committee)	
Gross β	, , ,	Guideline with regard to measuring released-radioactive material at the light-water type nuclear reactor for power generation. (Nuclear Safety Committee)	
Tritium	Distillation method	Guideline with regard to measuring released-radioactive material at the light-water type nuclear reactor for power generation. (Nuclear Safety Committee)	

[Reference Baseline]

Unit:Bq/L						
	Cesium134	Cesium137	Tritium			
Notification concentration llimit※ 1	60	90	60000			
WHO drinking water quality guideline	10	10	10000			
Radio active material in drinking water	10 ^{**2}	_				
Guideline regarding radioactive material at beach	10 ^{%2}		_			

*1 Concentration of radioactive material in the water at the outside border of supervised area

nuclear power station

*2 Total concentration of cesium 134 and cesium 137
