

## Fukushima Daiichi Nuclear Power Station: Radiation Analysis Results at K Drainage Outlet

Unit: Bq/L

Place of Sampling	K Drainage Outlet								
Date of Sampling									
Time of Sampling									
Cs-134 (Approx. 2 years)									
Cs-137 (Approx.30 years)									
Gross β

\*The data surrounded by a thick line are newly released this time. The other data have already been released by yesterday.

\*The amount of radioactive materials is considered to be increased because the surface soil flowed into the drainage due to heavy rains.
