

【Reference】 Sampling of gas in Primary Containment Vessel of Units 1 and 2, Fukushima Daiichi Nuclear Power Station

July 28, 2011
Tokyo Electric Power Company

We will install temporary sampling devices in Units 1 and 2.
Using these devices, we will take samples of the gas in the Primary Containment Vessels (PCVs) through pipes in reactor buildings and measure radioactive material concentrations within PCVs.

[Planned Measurement Date]
Unit 1: July 29 (Fri)
Unit 2: Planned in early August
