

Nuclide analysis results of ocean soil

Reference

(Data summarized on December 10)

| Place of Sampling             | 3km offshore of Haramachi-ku               | 3km offshore of Odala-ku          | 8km offshore of Odaka-ku          |  |  |
|-------------------------------|--|-----------------------------------|-----------------------------------|--|--|
| Time of Sampling              | December 8, 2011<br>(Not sampled)          | December 8, 2011<br>(Not sampled) | December 8, 2011<br>(Not sampled) |  |  |
| Detected Nuclides (Half-life) | Radioactivity density ( Bq/kg· moist soil) |                                   |                                   |  |  |
| I-131<br>(about 8 days)       | -  | -                                 | -                                 |  |  |
| Cs-134<br>(about 2 years)     | -  | -                                 | -                                 |  |  |
| Cs-137<br>(about 30 years)    | -  | -                                 | -                                 |  |  |

\*Not sampled due to bad weather.
